Atul Kumar

Full Stack Java Developer

## SUMMARY

4 years experienced and dedicated java web development professional with a demonstrating capability in designing, developing & deploying web applications in different environment following various technologies and methods. Seeking to part of a team where I can enhance my expertise as a java full stack developer.

## KEY SKILLS

- Website Development. & Deployment
- Team Leadership
- Application Design and Architect
- DevOps Practitioner
- Agile Methodology
- Managerial & System Support
- Client Interaction
- Stakeholder Interaction
- Debugging

## TECHNICAL SKILLS

- **Backend:** SpringBoot, Servlets, Hibernate
- **Frontend:** Bootstrap, JavaScript, jQuery, React JS, HTML/HTML5, CSS, Angular JS, c3 Js
- **Databases:** PostgreSQL, MySQL
- **Devops:** Git, Gitlab, Jenkins, Docker
- **Cloud:** Azure, AWS

## CERTIFICATONS

- Azure Certified Developer
- AWS Cloud Practitioner
- Azure Fundamentals
- Edureka Certified DevOps Engineer

## AWARDS

- Star of the Month for developing Calibration Engine
- Service and Commitment for completing 3 yrs in TCS
- (S)miles award for being a Tech panelist interviewing btech candidates
- Received 2 Elevate Wings Awards for cracking 2 tracks in TCS Digital Cadre program

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

Jul '18 - Present

#### Tata Consultancy Services

Chennai, IN

#### Web Application Development

- **Calibration Engine:** Developed a web application following 3-tier architecture. Saving thousands of records of candidates giving entrance exams of TCS in db, processed it to provide vizualization in form of charts and reports using React Js, C3 JS, SpringBoot and PostgreSQL. Also builded the feature of calibration the score data on a single button click-through interface builded in React JS. The application was presented to TCS iON head **Mr. Venguswamy Ramaswamy** and got appreciation for the same. Ever since it's in use.(Jan'19-Dec'19)
- **Layout App:** Developed an interface using HTML, bootstrap and jQuery to create templates for an internal product. Provided option to change sections of a template in different ways and export the data in the required format.(Jan'20-Mar'20)
- **Customer App:** As a part of the Microservice architecture of an ongoing project, I designed and developed the only customer-centric service along with it's backend service using React JS, Spring Boot and PostgreSQL, to show gallery of work done, giving option to user to personalize the product based on their own choices and preferences with few customizations to it. Showcased to TCS TD Head and Titan Taneria team(Mar'20-Present)
- **Profile Service:** Developed a generic profile and workspace service for a logged-in user based on their role showing personal details and work done, integrating it with OAuth service. Based on jQuery, Bootstrap.(Feb'22-May'22)

#### Team Leadership & Coordination

- **Spearheaded training** and development of a team of new freshers for 4 consecutive batches of 24 on various topics like Java, javascript,css bootstrap, web development & mentored them in developing small innovative incubator services. ( Jan'19 - Jul'20)
- Coordinated and promoted with the top-level professionals and senior management in an Agile **development environment** to support short iterative cycles.
- **Currently Leading** my team, **managing** standup calls, **guiding and helping** technically and operationally, resolving conflicts, and queries sharing updates with stakeholder to ensure on-time delivery of the iterations( Mar'22 - till date)
- **Worked** with the Talent Acquisition team of the organization to organize tests for different categories of freshers smoothly. ( Mar'19 - Jul'20)

#### Process Optimization

- **Proposed** and **introduced microservice architecture** to the team showing its benefits for our next project and later started implementation of the same along with the team.
- **Successfully migrated** the frontend of a live application from jQuery to Angular JS thereby fixing some responsivenss issues.( Oct'18- Dec'18)

### DevOps Engineer

Jan '20 - Present

#### Tata Consultancy Services

Chennai, IN

#### CICD Pipeline

- **Streamlined** CICD pipeline using Jenkins, git, and docker for 5 in-house applications used for training and development.
- **Deployed** 7 services of microservice architected application in internal cloud environment following cicd pipeline.

## EDUCATION

### BCA

Aug '15 - Jun '18

#### St. Xaviers College, Ranchi

Ranchi, IN

### MCA

Aug '18 - Jul '21

#### SASTRA University, Thanjavur

Chennai, IN
