Summary

As a software Engineering i having 1.8 year experience, I am a skilled professional with expertise in designing, developing, and maintaining software applications. I have a strong understanding of programming languages, software development methodologies, and tools necessary for creating efficient and scalable solutions. My technical skills encompass a range of programming languages such as Java along with proficiency in frameworks and libraries such as Angular. I am knowledgeable in database managementsystems, including SQL and MySQL, and have experience working with various operating systems Throughoutmy career, I have gained expertise in software development lifecycle, including requirements gathering, system design, coding, testing, and deployment

Experience

Digirestro Solution PVT LTD

Baner, Pune

Software Engineer

03/2022 – 11/2023

- Project -: Restaurant Management System-Collaborated with cross-functional teams to design, develop, and maintain Using Angular, Java and Microsoft SQL
- Utilized HTML, CSS and JavaScript to create dynamic and user-friendly Web interface, enhancing the overall user experience
- Demonstrated proficiency in Angularjs, leveraging its capabilities to build responsive and interactive front-end components.
- Applied strong Object-oriented programming principles to java development, ensuring code quality and maintainability.
- Worked closely with back-end developers to build RESTful APIs, facilitating seamless data exchange between the front-end and back-end systems
- Leveraged 1+ years of experience in Java and AngularJS to deliver high-quality software solutions
- Contributed to database development, including data modeling, SQL, PL/SQL, and the creation of packages, procedures, and functions to support web-based software tool.
- Ensured data integrity and efficiency, producing HTML-based outputs for various processes
- Analyzing user requirements, envisioning system features and functionality.
- Design, build, and maintain efficient, reusable and reliable Java Code by setting expectations and features priorities throughout development life cycle.
- Identify bottlenecks and bugs, and recommend system solutions by comparing advantages and disadvantages of custom development.
- Contributing to team meetings, troubleshooting development and production problem across multiple environments and operating platforms.
- Understand Architecture Requirements and ensure effective Design, Development,/validation and Support activities.

Education

PRF Ramkrishna More College

MSC in Computer Science

2021 - 2023

MIT Arts Commerce Science

BSC(Computer Science)

2016 - 2019

Sayajinath Maharaj College

HSC(XII)

2014 - 2016

K.S.S.N. Barse Madhyamik Vidyalaya

SSC(X)

2013 - 2014

Skills

Angular ·angularjs ·Apache ·Apache Tomcat· API · CSS · data integrity · Data Modeling · Eclipse · Front-end · HTML ·html 5 ·Java ·Javascript ·Linux · Microsoft SQL ·MySQL ·Object-Oriented Programming ·Requirements Gathering ·restful ·restful apis ·Spring Boot ·SQL ·Tomcat ·Typescript ·Windows ·JEE · Testing · Debugging · Application development

Training / Courses

Full Stack Developer
