- Having 2+ years of experience in JAVA/J2EE technologies with development of software applications components.
- Having hands on experience in Collections, List, Set, Map.
- Having good exposure in implementing OOPs Principles.
- Good knowledge and experience in exception handling and multi-threading.
- Experience in managing persistence tier with Spring Boot using JDBC and Hibernate.
- Worked in Agile based software development. Good exposure in Software Development Life Cycle including Design, Implementation and Testing during the development of software development.

Project Experience:

Duration :2 year 6 months

Project Name: BUSINESS MODEL
Client: Bymaa Laboratories Pvt Ltd

Skills& Technology Used:
Java 8, Spring Boot, MySQL.

Description:

Supporting the feature called "Business Model" in a web-based application.

Roles & Responsibility: Project support-(11 months)

- Access detailed information of organization's verticals, allows to offer targeted support to developers working on distinct segments.
- Seamless integration with developer friendly RESTful APIs ensures that can easily extract relevant business data to support developers in their day-to-day tasks.
- Support developers working on localized features more efficiently utilizing information on domestic market presence, ensuring a smoother localization process.

Project Name: AGENT LOGIN
Client: Parveen Travels

Skills & Technology Used:
Java 8, Spring Boot, Junit, MySQL

Description:

To develop an integrated software feature with java 8 to provide a secured and specialized environment for authorized agents to access the relevant functionalities within the application.

Roles & Responsibility: Backend Developer-(1 year 1 months)

- Adding a feature in web application called AGENT LOGIN Using Spring boot
- Implement comprehensive unit testing using Junit for standard testing. Ensure the reliability and correctness of the "AGENT LOGIN" feature through systematic testing
- Utilize the Base64 encoding to enhance the security of credentials during the authentication process
- Enhance logging and auditing functionalities with Apache Kafka for distributed event-driven communication.

Project Name: POSTING A FREE AD
Client: Sulekha Groups
Description:

Skills & Technology Used:
Java 8, Spring Boot, Junit, MySQL

To implement a feature called "Post A Free Ad" as a Backend Developer in an application.

Roles & Responsibility: Backend Developer-(7 month -Present)

- Collaborated with the team to design scalable and robust backend systems for the "Post A Free Ad" feature.
- Developed RESTful APIs using Spring boot to handle the posting of free ads.
- Implemented Kafka Producers and Consumers to handle asynchronous process.
- Worked closely with frontend developers, ensuring seamless integration between frontend and backend components.
