PROJECT

Description:-

easyMarkets is a platform which allows user to trade CFD's on commodities, forex, shares, indices and cryptocurrency. easyMarkets offers users a choice of two platforms: its own proprietary platform, which is web based (HTML5) and MetaTrader 4 (MT4).The brand's own platform is relatively light and features a simplicity and cleanliness which is useful in keeping users focused on trading. However, it may not be quite enough to satisfy more demanding or experienced traders. On the other hand, MetaTrader 4 is one of the go-to platforms for online trading, and as such it has an excellent reputation.

Roles and responsibilities:-

- Planning and designing J2EE applications as per business requirements.
- Preparing and maintaining entire documents for projects
- Responsible for **developing modules.**
- Transforming requirements into stipulations
- Support continuous improvement
- Investigating alternatives and technologies.
- Identified **designing and involved in development.**
- Active participation in **weekly/daily status calls with the client.**
- Developing Server-side scripting
- Presenting for architectural review
- Communicate and follow through with technical leads on application stories.
