## Work Experience:

Company : VIS Network Pvt Ltd

Role: Software Engineer

Start Date : 01-12-2022

**Project : 1) Avarn Project :** In This project I worked as a Junior Java developer role and also I gave the Support work. if Any issues are occurred I am handling it.

- Here In this project basically check weather the customer is Registered User or not Registered User
- And also the customer is belongs to security user group or not
- Resetting password and Unlocking account services .

- And In this project we used SQL data base to store Data
- And Used postman for sending HTTP Requests.
- So based on some parameter services are providing to customers.

**Company : PWC**

**Role: Associate Engineer**

**Start Date : 15-04-2021**

**End Date: 25-08-2022**

**Project : 1)KP Mobile App development – Health Industries :** In this project I worked as a front end developer .

- Here basically used HTML and CSS for Creating Multiple Login pages and also added some button functionality using Java script concepts.
- And also created the responsive web design .
- And added different Menu and Logos and search bar etc.,

**2) Autodesk inc - Topline Management Reporting Assessment :** In this project I worked as a Java developer Support role .

- Here we created Customer App for Mobile payment service, this allow the users to easily transferMoney.
- And added some security feature by adding some password management.
- Here used SQL database to store the customer data .
- Added some pop up message to know the customer payment is success or not .
- And this project helps the customer to transfer money in an easy way with more security feature.
