Database Software:	Oracle, MySQL

Other Skills: 3rd party Integration , Debugging ,Bug Fixing, JIRA

Front-end Languages: HTML, CSS, JavaScript, Angular

Database Tools: SQL-developer, MySQL workbench

Project:

Prayaas

(Domain – Banking Domain)

The Prayaas project, initiated by SIDBI in collaboration with Micro Finance Institutes, aims to facilitate business loans across diverse demographics and geographies. These loans are available in both rural and urban areas, enabling borrowers to establish their own businesses. The loan amounts and tenures are tailored to meet individual borrower needs.

Micro Finance Institutes (MFI):

MFIs are instrumental organizations that provide financial services to low-income populations. They offer loans through Joint Liability Group or Self-Help Group formats. MFI agents serve as the primary point of contact for borrowers, playing a crucial role in extending financial services to rural areas.

Responsibilities:

I As a developer on the pryass project, I actively contributed to the development of MicroServices and software components that enabled seamless loan processing and management. My responsibilities includes:

- **Full Stack Development**
- **Development in software design, development and testing.**
- **Take full ownership and deliver component or functionality**
- **Database Design and Management**
- **Team Collaboration**
- **Problem Solving**
- **Independent Work**
- **Documentation**
- **Domain Knowledge**
- **Skills Enhancement**

I hereby declare that all the details furnished above are true to the best of my knowledge and belie
