LinkedIn - www.linkedin.com/in/mohit-jejurkar

Experienced Java Developer with expertise in Spring Boot, Restful APIs, Mongo DB, and Microservices. Skilled in IDE tools, version control systems, and Agile methodologies. Strong problem-solving abilities and a proven track record in delivering high-quality, scalable solutions. Seeking a dynamic role to leverage my technical skills and contribute to innovative projects.

PROFESSIONAL EXPERIENCE

Lentra AI | Software Engineer | June 2022 – Present

- Developed API gateway using Spring Boot to optimize vendor interactions and streamline processes.
- Implemented circuit breaker mechanism to enhance system resilience and mitigate back pressure during downtime.
- Integrated Spring Cloud Configuration for dynamic configuration management.
- Created cloning API for client onboarding within strict deadlines.
- Proficient in SQL query development, modification, and optimization for large datasets.
- Applied Object-Oriented Programming principles for asynchronous programming.
- Integrated Kafka for real-time transaction processing in event-driven architecture.

EDUCATION QUALIFICATIONS

Year	Examination	Institution/ University	CGPA/%
2021	Bachelor of Engineering	Pune University	7.23 CGPA
2016	12th Standard	Maharashtra State Board	60%
2014	10th Standard	Maharashtra State Board	76%

SKILLS

- **Languages:** Java 8, Java 11
- **Database Software:** PostgreSQL, MySQL, Mongo DB, Redis
- **Frameworks:** Spring, Spring Boot, Hibernate, JPA,
- **Spring Modules:** Microservices Architecture, Restful API, JDBC, DAO, Spring MVC, Spring Security, Spring Data JPA, Spring Cloud Config, Spring Core, Spring AOP, Spring Batch
- **Web Services:** Restful APIs
- **Tools:** Log4j, SLF4J, Git, Maven, Gradle, Jira, Postman, Agile Methodology, CI/CD pipeline, Apache Kafka, Docker, Kubernetes
- **Testing Frameworks:** JUnit, Mockito
- **Core Java Skills:** Object-Oriented Programming (OOP), Multithreading, Collections Framework, Exception Handling, Java Streams API, Lambda Expressions

TRAININGS & CERTIFICATES

- Java Full stack Developer | Q Spider | 2021

PROJECTS

GOGETR

- Developed micro services architecture solutions using Spring Boot and Java.
- Acted as API gateway, connecting vendors with clients.
- Managed request flow from products to vendors.
- Performed data validation and transformation to ensure integrity and compliance.
- Implemented encryption, decryption, and certificate-based security operations.
- Handled post-transformation tasks on vendor responses to meet client requirements.

GGTRX

- Configured request and response mapping within the project for optimized data handling.
- Utilized PostgreSQL as the primary DBMS for efficient data storage and retrieval.
- Implemented pg-bouncer for managing idle connections and optimizing short-lived database connections.
