🧠 SKILLS

Java 8 | Spring Boot | Data Structures
Algorithms | Microservices | REST | JUnit
AWS | Jackson | Git | Oracle | JMeter

📁 PROFESSIONAL EXPERIENCE

Associate Consultant, Capgemini

07/2022 – Present

- Utilized **Java 8** features to design and implement an automated system capable of intelligently identifying mapper classes and extracting relevant source and target details.
- Automated the conversion of extracted details into visual diagrams, enhancing the comprehensibility of mapping details, and reducing manual effort by 95%
- Developed services and applied **design patterns**, leveraging Java 8, and **Spring Boot** to improve efficiency and maintainability within a banking project.

Software Developer- DCX Practice, Capgemini

06/2021 – 06/2022

- Completed a comprehensive training program in **Java Full Stack** development with **Angular**.
- Optimized a parking slot allocation project using Java, Angular, and other relevant technologies.
- Underwent **Pega** training and earned the System Architect certificate in Pega Technology.

🏆 ACHIEVEMENTS

Rising Star, Capgemini

Received 'Rising Star' as an appreciation for my contribution to the organization.

Xcorps Engineer, Capgemini

Selected as one of 15 engineers out of 5,000 applicants to join the elite engineering team at XCorp, demonstrating exceptional skills.

🎓 EDUCATION

B.E | EIE, SRM Valliammai Engineering College

08/2016 – 05/2020

🌐 LANGUAGES

English

Tamil

📁 PROJECTS

Movie Ticket Booking Application

07/2023

- Developed a microservices application with a **RESTful API** for a movie ticket booking application.
- Integrated **AWS Cognito** for user **authentication** and **authorization**, ensuring secure access to application endpoints.
- Set up and configured **Amazon API Gateway** to manage and secure RESTful APIs.

Parking Slot Allocation System

08/2021

- Created an online parking system enabling users to reserve parking slots for specific time slots.
- Contributed as a team member with a primary focus on the Admin module, streamlining the management of parking premises.

📚 COURSES

Fellowship in Software Development, Crio.do

12/2022 – present

QMoney

12/2022 – 01/2023

Skills: Java, REST, Jackson, Factory Design Pattern, Junit, Mockito

- Developed a stock analyzer tool for portfolio managers to help them manage their client's trades.
- Utilized **Jackson** library to serialize & deserialize JSON files containing historical trades made by a user and extract the list of stocks held by the user.
- Examined **REST APIs** to call third-party services like Tiingo & Alpha Vantage to retrieve stock quotes on a given historical closing date.
- Enhanced application performance by 30% + using **multithreading**.

QEats

02/2023 – 03/2023

Skills: Java, Springboot, Rest, Jackson, Lombok

- Developed different parts of the QEats backend, which is a **Spring Boot** application.
- Created several REST API endpoints to retrieve restaurant details and facilitate food orders.
- Enhanced the application's performance during high-load scenarios and incorporated an advanced search functionality.
