### Projects

**Project Name : MadBowl (Online Food Delivery)**

**Overview:** The Online Food Delivery Platform is a web-based application that connects users with local restaurants, enabling them to order food online for delivery or pickup. It provides a convenient and efficient way for users to browse menus, place orders, and enjoy a wide range of culinary offerings.

#### Key Features:

- Restaurant Listings: User-friendly interface for browsing restaurants, menus, and reviews.
- Order Placement: Seamless process for selecting items, customizing orders, and making payments.
- Real-time Tracking: Live order tracking, allowing users to monitor the delivery progress.
- Secure Payments: Integration of secure payment gateways for hassle-free transactions.
- Ratings and Reviews: User-generated ratings and reviews to aid decision-making.
- Account Management: User profiles with order history, preferences, and saved addresses.

#### Technologies Used:

Core Java, Spring boot, Spring, HTML5, CSS3, Bootstrap, JavaScript, React Js , JSp/servlet, MySQL.
