Mumbai

2020 - 2021

Degree-73.9% Grade- A

Project Description

DIY Fitness

Technology Used: - Java, J2EE, Hibernate, Angular 12, Apache tomcat server, Spring-Boot.

DIY Fitness is a web application for achieving fitness goals. The application supports the flexibility for users to choose the training type, provide access to proper planning of workout and diet and to keep track of progress. This project is developed in J2EE by using Spring-Boot with JPA Hibernate using Oracle database and for front- end we have used Angular12.
