## Work History

2023-10 -  
Current

### VMware Administrator L2

Syndrome Tech

- Responsibilities include ESXi host /Vcenter upgrade and patching activity, migration strategy and plans execution, hands-on experience on Client virtualization, Hypervisors, Windows, and Linux, storage creation, host upgradation, port group creation, cluster creation, incident-based issues of ESX and ESXI hosts, hardware components, LUN mapping and unmapping, VCF upgradation, VRealize Log Insight, configuring virtual networks, security and load balancing policies, NIC teaming and failover policies, alarms and scheduled tasks configuration, vCenter plugins, migration concepts like Vmotion and Storage Vmotion.

2022-06 -  
2023-10

### VMware Administrator

WIPRO

- Responsibilities include L2 support, managing and monitoring installed systems and VMware infrastructure, performing OS baseline and VAPT implementing activity, performing OS upgrades, checking hardware-related issues, performing DC activity, ESXi host upgrade and patching activity, migration strategy and plans execution, data center assessments, good experience and hands-on experience on Client virtualization, Hypervisors, Windows, and Linux, storage creation, host upgradation, VLAN creation, cluster creation.

2021-07 -  
2022-06

### Senior Technical Engineer

Team Computer Pvt Ltd

- Responsibilities include VM-ware installation and configuration, new VM creation, VM migration, VM storage extending, RAM extending, VCenter or ESXI upgradation, VCenter monitoring, Nutanix HCI installation, VeemBackup configuration, backup of servers, resolving problems related to application software, tracing network-related issues, configuring and resolving errors in backup server, performing server maintenance operations.

2019-01 -  
2021-05

### System Engineer

*Aletheia Technology Pvt Ltd*

- Responsibilities include basic software installation, backup of servers, resolving user problems related to application software, tracing network-related issues, configuring and resolving errors in MS Outlook & Thunderbird mail client.

## Education

2019-01

### BSC IT

*Sanpada College of Commerce And Technology*

GPA: 9.2/10

2016-01

### HSC

*Sanpada College of Commerce And Technology*

GPA: 54.35%

2014-01

### SSC

*Rose English High School, Mumbai*

GPA: 67.40%

## Certifications

VMware vRealize operation manager

VMware Vsphere 7

Nutanix

Nutanix Cloud fundamental

AWS practitioner

CCNA (Routing and Switching)

## Product Expertise

- VMware VSphere
- VMware VRealize Log insight
- SDDC Manager
- VSAN
- Vxrail
- NSX-T
- Nutanix
- Arcon
- Dell OME
- HP one view
- Virtualization (VMware, hypervisor)
- VROPs(VMware Monitoring tool)
- Cyberark
- CA Spectrum
- UIM
- Event Grid
- Service Now
- Service desk

## Working History

- Syndrome Tech, Oct 2023 to Present, LIC, VMware Administrator L2, Esxi host /Venter upgrade and patching activity, including BIOS and firmware upgrade, Develop migration strategy, and migration plans and execute with zero flaws on different scenarios like P2V, V2V, V2C, and P2C, Hands on experience on Client virtualization, Hypervisors, Windows, and Linux, Storage creation, Host up gradation via other ways like Command line, Baseline\LCM, Port Group Creation Vmotion Configuration and switch level Port checking and vlan tagging, Cluster Creation host creation and chaise configuration, Working on Incident based issues of ESX and ESXI hosts, Hardware components like HP,DELL EMC,Cisco, LUN mapping and unmapping as well as UUID enabled activities, Working on VCF upgradation via SDDC Manager, Working on VRealize Log Insight, Creating Clusters, Configuring HA, DRS and vMotion, Configure Virtual Networks on Standard and Distributed switches, Configure Security and load balancing policies on the Virtual switches, Setting up NIC teaming and failover / failback policies, Configure Alarms, Host profiles, and Scheduled Tasks, Also worked on vCenter

plugins like Update Manager, guided consolidation, Working on Migration concepts like Vmotion, Storage Vmotion and Cold, Room no-137, Road no-12 Shastri Nagar, Govandi, Mumbai, 400043, sayyedsuhailahmad786@gmail.com, +91-9004668215/ 9082921732, www.linkedin.com/in/sayyed-suhailahmad-

- WIPRO, June 2022 to Oct2023, HDFC, VMware Administrator, Provide L2 support and resolve basic issue facing by end user, Managing and monitoring all installed system and VMware infrastructure, Performing OS baseline and VAPT implementing activity on windows server, Performing OS upgrades on a windows server (VM and physical servers), Check hardware-related issue and logging call with hardware vendors (DELL, HPE and Cisco), Performing DC activity as per requirement, ESXi host upgrade and patching activity, including BIOS and firmware upgrade, Develop migration strategy,migration plans and execute with zero flaw on different scenario like P2V, V2V, V2C, P2C, Assist in Data Center assessments, infrastructure risk identification and move group planning, Should have good experience and hands on experience on Client virtualization, Hypervisors, Windows, and Linux, Storage creation, Host up gradation, Command line, Baseline\LCM Venter Upgradation, Vlan

- Team Computer Pvt Ltd, July2021-Jun 2022, USV, Senior Technical Engineer, VM-ware installation and configuration, New VM creation VM Migration VM Storage Extending RAM Extending, VCenter or ESXI Up gradation, Vcenter Monitoring Through the Vrops, Nutanaix HCI Installation With storage CVM and Foundation like Acropolis etc, VeemBackup configuration and Daily check, Backup of Servers using NT Backup, and third-party tool like Symantec Backup Excu 2012, Resolving problems related to Application Software, Tracing Network related issue from the datacenter end to switch Panel, Crimping and Punching, Configure and resolve errors in backup server, Responsible for performing all server Physical or virtual maintenance operations Activity in datacenter, Handling Archiving and Retrieving Data and Restoration Project
- Aletheia Technology Pvt Ltd, Jan 2019-May2021, Alkem, System Engineer, Basic Software Installation in Laptop & Desktop, Backup of Servers using NT Backup, and third party tool like Symantec Backup Excu 2012, Resolving user problems related to Application Software, Tracing Network related issue from user end to switch Panel, Crimping and Punching, Configure and resolve errors in MS Outlook & Thunderbird mail client
