PROJECT DETAILS

AU-SBL(Secured Business Loan) /AU-HL(Housing Loan) / AU-WHEELS(Wheels Loan) (08/2021 - 07/2023)

- Spearheaded the development of a comprehensive **financial web and mobile application**, catering to Secured Business Loans (AU-SBL) and Housing Loans (AU-HL), facilitating **collateral-based loan approvals**. Managed end-to-end loan documentation, providing a seamless experience for customers from Quick Data Entry (QDE) to Payment Checker (PIC) stages across both web and mobile platforms
- **Technical Overview :**
- Developed on **Microservices Architecture**, utilizing Spring MVC and **Spring Boot** for efficiency . Employed **Oracle** as the database and **Hibernate** for seamless connectivity. Implemented **RESTful architecture** for API development.
- **My Role and Responsibilities :**
- Led Business Requirement Analysis and actively contributed to design discussions. Engaged in enhancing and developing APIs within the project.
- Played a pivotal role in a change request team, implementing new functionalities.
- Work on new enhancement and API development in the project.
- Executed the development of **Spring MVC** modules, adhering to MVC architecture.
- Designed and implemented Controller, Service, DAO, and Utility-specific Java classes.
- Conducted multiple **business validations, addressing tickets assigned on ZOH0.**
