Industry: FinTech / Payments

Key Skills: Spring Boot, Microservices, Spring, Java, MySQL, Oracle, Javascript, HTML, CSS

Work Experience

Financial Software Systems(FSS) Pvt Ltd

Software Engineer | Feb 2022 To Feb 2023

Payment Gateway is an e-commerce application service provider for processing the transactions in Real Time. It acts as a Virtual terminal, where the user can select multiple payment options such as Credit card, Debit Card, Prepaid Card, Wallets (like PayZapp, Amazon Pay, Airtel Money etc.), UPI, Net banking etc. Merchants get integrated with our PG plugins and forward the Card credentials from the merchant shopping cart portal to PG for processing the payment. Once the Payment is successful, response would be communicated back to merchant shopping cart portal. Merchant would log the response and show the customer with the status of the payment. This facilitates the transfer of information between a payment portal (such as a website, mobile phone or interactive voice response service) and the Front End Processor or acquiring bank.
