EXPERIENCE

Program Analyst

Feb 2022 - Present, Noida

Cognizant Technology Solutions

- Focused primarily on **Web Technologies** and **J2EE application development**, leveraging JSP, Servlets, Spring Boot, JDBC, Angular, and Hibernate H2
- Contributed to the **Abbvie project**, gaining valuable insights into basic **healthcare services** and domain-specific needs
- Played a key role in **backend development**, utilizing Spring Boot and Hibernate H2 to update and implement new policies
- Drafted and upheld comprehensive **documentation** outlining program development, logic, and troubleshooting procedures
- Utilized a range of skills to **assess, design, implement, and enhance** databases and database applications

PROJECTS

Employee details website

July – Sept 2022

- Utilized Java, Spring Boot, H2 Database, AngularJS, Eclipse, and Postman in executing tasks and projects
- Led the development of a comprehensive employee management website, orchestrating the integration of diverse microservices to elevate functionality
- Leveraged Angular for frontend design, **Spring Boot** for backend infrastructure, and **H2 database** for secure data storage. Utilized **Postman** for thorough API testing, ensuring reliability. Successfully delivered a resilient platform for systematic employee detail tracking, encompassing information such as names, addresses, and blood groups, thus safeguarding sensitive data for future organizational utilization

Retail Banking Management

Sept – Nov 2022

- Skills and Tools Utilized: Java, Spring Boot, H2 Database, AngularJS, Eclipse, Postman. Developed a **microservices-based web application** for Retail banking using Java, Spring Boot, H2 Database, and Angular. This application caters to two types of end users: employees and customers. It facilitates various banking operations for both types of users

Voice Based Email Service for Visually Challenged People

Oct – Jan 2021

- Skills and Tools Employed: Apache Servers, CSS, Google Text-to-Speech Library, Java, HTML. Developed a web-based application utilizing **Java, HTML, CSS, and Apache**, integrated with Google's free text-to-speech library. This application enables visually impaired individuals to compose and manage emails using voice commands

SKILLS

- **Technical Skills:** Java, JDBC, Springboot, Angular, Hibernate-h2, CSS
- **TOOLS:** Eclipse, postman, vs-code, apache-tomcat
- **Soft Skills:** Team player, good communication, Leadership, Work ethics
